

## Campus Computer Network Regulations

1. The Rules are set according to the “NTNU Campus Computer Network Regulations”
2. Every IP has a daily data limit of 10GB for all uploads and downloads. If the amount of the data flow exceeds the limit, the specific IP will be temporarily blocked until the midnight of the following day.
3. International connections to P2P services for administrative and teaching divisions have flow limitations. The P2P services for the dormitory network and WIFI is regulated.
4. For particular needs in excessive data flow or accessing P2P services, please fill out the application form for Excessive use of data flow and Connection to P2P services.
5. When the campus network is overloaded, the technology center should response.
6. The Rules are approved by the Administrative supervisors, applying as well to all modifications.
